Introduction

The following report contains a Pension Carry Forward & Tapered Annual Allowance forecast.

In order to utilise carry forward, you must have been a member of a registered pension scheme in any previous tax year that carry forward is utilised.

You may only receive tax relief on personal contributions up to a maximum of your net relevant earnings for the current tax year.

Employers may make a pension contribution in excess of your current years net relevant earnings, up to your maximum carry forward allowance. This contribution may then be able to be offset against the employers corporation tax liability.

Please Note: The 2015/2016 Tax Year was subject to special transitional allowance rules; allowing for a potential maximum allowance of £80,000.

Up to £40,000 for any contributions made before the 09/07/2015 and £40,000 thereafter.

Annual Allowance tapering will occur where threshold earnings are above £110,000 and adjusted earnings exceed £150,000.

Overview

Forecasts included:

- 2. Put £5k into PPP personally not employer - fix problem

Forecast: 2. Put £5k into PPP personally not employer - fix problem
